

Ruogu Wang

Software Developer

Tel: (979)739-5978 Email: wangruogu1996@gmail.com LinkedIn: www.linkedin.com/in/ruoguawang1225/

Address: 12474 Starcrest Dr., San Antonio, TX 78216

A Software developer with 1-year experience developing efficient and robust code for applications and services in an agile team with the passion to produce good code.

WORK EXPERIENCE

DigitalDesk Inc. , San Antonio, Texas

Sep. 2019 to Present

Software Developer

- ◆ Develop, test, and debug applications created with .Net, .Net Core, C#, AngularJs, React and MySQL.
- ◆ Deploy and maintain applications with IIS manager and CI tools on Win server.
- ◆ Documentation writing and Git branches operating.
- ◆ Major projects developed include:
 1. scheduled data importing task as a hosted service created with .Net Core and Topshelf on server,
 2. data visualization module to calculate and display data using charts and graphics on web application,
 3. message board to display messages and events based on current user's identity and events in database,
 4. migrating report creating and emailing module from VB to C#,

DigitalDesk Inc. , San Antonio, Texas

June 2018 to Aug. 2018

Software Developer Intern

- ◆ Assistant implementing, developing, and testing new features for web applications.
- ◆ Develop new exam creating and modifying feature that supports filling, validating, and submitting forms and therefore insert or update records in database.

ChuangRen Tech, Wuhan, China

Sep. 2016 to Dec. 2017

Software Programmer Intern

- ◆ Assistant developing and debugging web applications using Java, Spring, HTML, JavaScript, and MySQL.
- ◆ Develop a web application to store and analysis natural water quality data and generate reports.

EDUCATION

Texas A&M University, College Station, Texas

Aug. 2017 – May 2019

- ◆ Master of Engineering in Computer Engineering GPA: 3.9/4.0
- ◆ Project experience:
 1. TinySQL: developed a console based tiny relational database system including process control, query parser, data searching algorithm and data storing algorithm to implement basic CRUD operations using Java.
 2. Ranch management system: developed and deployed a staff management web application using Ruby on rails to accomplish functions including user checking-in, form filling, simple data analyzing, report generating and notification pushing.
 3. Face detection: trained a face detection modal with OpenCV and Python and analyzed the performance.

Huazhong University of Science & Technology, Wuhan, China

Sep. 2013 – Jul. 2017

- ◆ Bachelor of Engineering in Electronic Information Engineering GPA: 3.5/4.0

SKILLS

-
- ◆ C#, Java, JavaScript, TypeScript, HTML, CSS, MySQL.
 - ◆ ASP .Net, .Net Core, AngularJs, React.js, Bootstrap, Spring, Spring MVC.
 - ◆ Agile developing, RESTful API, Git, IIS, Apache.
